

Sales Data Analysis Dashboard Summary

Dashboard Overview

This Sales Data Analysis Dashboard provides insights into customer orders, revenue generation, product performance, seasonal trends, and city-wise sales. It helps management monitor business performance and identify opportunities to improve sales.

Key Performance Indicators (KPIs)

KPI	Value	Insight
Total Orders	1,000	Indicates total customer orders received.
Total Cities	100	Orders were received from 100 different cities, showing wide market coverage.
Average Revenue	₹3,520.98	Average revenue generated per order.

1. Order Analysis by Occasion

The dashboard shows customer purchasing behavior across different occasions.

Insights

- **Anniversary** generated the highest number of orders.
- **Raksha Bandhan** and **Holi** also contributed significantly.
- **Birthday** orders were moderate.
- **Diwali** and **Valentine's Day** generated comparatively fewer orders.

Business Insight

Customers purchase more gifts during family-oriented occasions such as Anniversary and Raksha Bandhan. Marketing campaigns should focus on these occasions for maximum sales.

2. Order Analysis by Day

This chart identifies which weekdays generate the most revenue.

Insights

- **Tuesday** has the highest revenue.
- **Sunday** performs second best.
- **Friday** and **Monday** have stable sales.
- **Wednesday** and **Thursday** show comparatively lower revenue.

Business Insight

Customer purchasing activity is highest during early weekdays and weekends. Promotional offers can be introduced on low-performing days to increase sales.

3. Revenue by Product Category

This chart compares revenue generated by different product categories.

Insights

Category	Observation
Colors	Highest revenue contributor
Soft Toys	High sales
Sweets	High sales
Cake	Moderate revenue
Raksha Bandhan Gifts	Average contribution
Plants	Lower revenue
Mugs	Lowest revenue

Business Insight

Gift items like **Colors**, **Soft Toys**, and **Sweets** are the primary revenue drivers. Low-performing categories such as Mugs and Plants may require promotional discounts or product improvements.

4. Revenue by Month

Monthly revenue trends reveal seasonal demand.

Insights

- Revenue peaks in **February**.
- Another significant peak occurs in **August**.
- **November** also shows strong sales.
- Sales remain relatively low during April, May, June, September, October, and December.

Business Insight

- February likely benefits from **Valentine's Day**.
- August corresponds with **Raksha Bandhan** celebrations.
- November experiences increased festive shopping.

These seasonal peaks indicate that festival-based marketing significantly impacts revenue.

5. Order Analysis by Product

Top-performing products based on orders.

Product Ranking

1. Magnam Set
2. Quia Gift
3. Dolores Gift
4. Harum Pack
5. Deserunt Box

Business Insight

Magnam Set is the most popular product. Increasing inventory and promotional efforts for top-selling products can maximize revenue.

6. Top 5 Cities by Orders

Cities generating the highest number of customer orders.

City	Observation
Imphal	Highest orders
Dhanbad	Second highest
Kavali	Third
Haridwar	Moderate
Bidhannagar	Lowest among Top 5

Business Insight

These cities represent the strongest customer markets. Regional marketing campaigns and faster delivery services in these locations could further improve sales.

Overall Business Findings

Strengths

- Wide customer reach across **100 cities**.
- Strong revenue during festive occasions.
- Healthy average revenue per order.
- High-performing gift categories drive overall sales.

Areas for Improvement

- Increase sales during low-performing months.

- Improve performance of categories such as Plants and Mugs.
 - Introduce promotions on weekdays with lower sales.
 - Expand marketing in cities with lower order volumes.
-

Recommendations

1. Festival Marketing

Launch targeted campaigns before:

- Anniversary season
 - Valentine's Day
 - Raksha Bandhan
 - Holi
-

2. Product Strategy

Focus inventory on:

- Colors
- Soft Toys
- Sweets
- Magnam Set

Reduce inventory or redesign:

- Mugs
 - Plants
-

3. Regional Expansion

Strengthen logistics and marketing in:

- Imphal
- Dhanbad
- Kavali

Explore expansion into cities with lower order penetration.

4. Seasonal Planning

Increase advertising and inventory before:

- February
- August
- November

Offer discounts during slower months to maintain consistent revenue.

Conclusion

The dashboard highlights that the business performs exceptionally well during major gifting occasions, with **Anniversary**, **Raksha Bandhan**, and **Valentine's season** driving significant sales. Product categories such as **Colors**, **Soft Toys**, and **Sweets** contribute the highest revenue, while **Magnam Set** is the top-selling product. Sales are strongest in **February**, **August**, and **November**, reflecting the impact of seasonal demand. Geographically, **Imphal**, **Dhanbad**, and **Kavali** generate the highest order volumes. Overall, the business has strong nationwide coverage with **1,000 orders across 100 cities**, and further growth can be achieved through targeted festival promotions, optimized inventory management, and focused marketing in high-potential regions.
